Teenagers Are Skeptical of Praise for Good Effort, Study Finds

Why the growth mindset requires more than praising their effort.

Teachers have long been told to praise students' effort, rather than simply saying they are "smart," as a way to encourage them to think of their intelligence as something that can grow over time.

But teenagers can be a prickly, contrary bunch with a finely tuned skepticism for adults, and a new review of

research in the journal Child Development suggests that just praising the effort of middle and high school students to boost their "growth mindset" can have the opposite effect, with those adolescents praised becoming less likely to believe their work can improve their intelligence or skills.
